

## DATA EXTRACTION SOFTWARE FOR FINANCE PROFESSIONALS

### Creating valued partnerships

StatementReader is an elegant and accurate solution that automatically extracts bank account transactions from a variety of different page layouts into a spreadsheet format.

We have developed StatementReader in-house, and have improved the tool based on the feedback received from our clients across the world. This skill set and experience allows us to work with our clients to give tailored advice on integrating an automated data processing solution that will save time and money.

### ... supported with passion

We are proud to provide our clients with a scalable solution for their data entry needs. When support is requested, we are always happy to help, either by e-mail, telephone or remote screen-sharing.

Challenge us! In a WebEx meeting lasting just 30 minutes, we can begin to understand your key requirements and demonstrate a solution that will allow you to regain control over manual or outsourced data processes. We will then help you to explain the benefits to your colleagues by providing a unique and concise proposal.

StatementReader converts scanned bank statements into a spreadsheet for financial analysis.

We work with: Banks, Insolvency Practitioners, Accountants, Loan Underwriters, Solicitors, Alternative Finance Providers & Business Process Analysts

Across: Australia, United States of America, United Kingdom, United Arab Emirates, New Zealand, India & South Africa

### ... that drive process efficiency

#### **Quickly installed and instantly usable**

Download, install and start to extract your data, securely on your computer, in just a few minutes. The application is also highly configurable for any advanced requirements that you may have.

#### **Automated analysis for a more efficient investigation process**

Summarise keywords, recurring transactions and round amounts in Excel, in just a few clicks, increasing the efficiency of identifying transactions that require further investigation and also providing comprehensive working papers for your file. Automated summary reports are generated in Excel for you to explore and communicate with colleagues and clients.

#### **Template driven for speed and accuracy**

StatementReader generates a single database from scanned images or searchable PDF documents. If the bank statement format isn't included, no problem, create your own template within StatementReader to be used immediately.

#### **Use less resources and enhance staff morale**

One page can take 5 minutes to process manually, with StatementReader this can take 3 seconds, a time saving of 99%. Every page that is entered manually could introduce errors. StatementReader uses bespoke algorithms to correct common OCR mistakes, and provides automated checks to the user for the effortless identification of errors, if they occur.

**Contact us today to start exploring your options for increased data processing efficiency.**

**All initial discussions are provided for free, without any obligation on you to utilise our suggestions.**
